Description

The Electrical Creation is a time bomb! For reals though. The E.C. has a shelf life of literally three turns (given 0 interaction), at which point it will actually explode. So, don't expect this people to stick around too long. We presume the E.C. is Ramos' experiment at trying to make a ball-lightning and succeeding for the most part- it floats around, wait for the opportune moment, and gets friendly with the enemy models.
