Imperial Human Assault Balloons

When master designer Fernardo de la Cruz, of the House Tepes, first talked about the idea of the Harrier Balloon he was openly mocked by his peers. But he built it and tested it, and soon mockery was replaced with high praise. The Harrier serves two roles: spotting enemy targets to help gunnery attacks and acting as a platform from which elite glider-born troops can attack enemy targets. 2 models per blister. Please note that Uncharted Seas models do not ship with stat cards or any other printed materials. Updated rules and statistics will be available from the 'Downloads' section of the Spartan Games website. Models are made from either resin, pewter, or a combination of the two. Models supplied unpainted and unassembled. Some preparation work may be needed before assembly. We recommend that resin models are washed before painting.
