Description

The year is 1947. The war that started a decade ago has now spread worldwide. The discovery of a crashed alien spacecraft in the Antarctic has led to the development of revolutionary combat walkers that surpass the most advanced tank technology. Old alliances have fragmented and new ones arisen as three major blocs, the Allies, the Axis and the Sino-Soviet Union (SSU) fight the world over for VK, a valuable new resource that powers their new fighting machines.

Dust Tactics Starter Sets are the best way to enter the world of Dust. Each starter comes with everything you need to field a force and play a game against any other starter set!
