Description
Legion: Carnivean/Ravagore/Scythean Heavy Warbeast Kit

Contains one unassembled unpainted plastic model.

The warlocks that serve the dragon Everblight can call upon a myriad of dragonspawn, each a perfect engine of draconic destruction. The Carnivean, an ancient and favored dragonspawn, shreds flesh, bone, and steel with its mighty claws and a shark-like maw. The Ravagore emulates it progenitor’s fearsome breath by engulfing foes in gouts of blighted fire. Terrifying in its brutal simplicity, the sickle-armed Scythean is another ancient breed created to single-mindedly destroy any who oppose its master’s will.

This box set contains three color stat cards and one multi-part heavy warbeast plastic model (PIP 73057). Included are all the components to assemble one of three heavy warbeast variants: Carnivean, Ravagore, or Scythean. A player may field any number of these heavy warbeasts in a Legion of Everblight army.
