Description
Orboros: Celestial Fulcrum Battle Engine

Contains one unassembled and unpainted resin/metal model.

None of the works of the Circle Orboros better demonstrates their mastery of the natural world than the Celestial Fulcrum, an enormous arcane apparatus that precisely models the seasons and the orbits of Caen’s moons. Able to harness the primal tides of nature, the Fulcrum can unleash lightning, fire, and deathly winds, plunging the fairest summer day into the heart of the maelstrom.
