Description
Skorne: Cyclops Brute

Contains one unassembled and unpainted model.

The tenacious and vicious nature of the cyclops brutes makes them singularly responsive to training, and the skorne rely on them to hold the flanks of formations or stand vigil over tyrants. Armed with towering shields and massive polearms, brutes constitute a virtually insurmountable threat on the battlefield. Their unique vision focuses on evading blows, and they can extend this power to those they protect.
